

CRYSTAL OPTICAL

Retinal Photos and Scan

We at Crystal Optical are concerned about you and your family's health and well-being. We use state-of-the-art technology to best assess the health of our patients' eyes. Serious eye health conditions such as macular degeneration, glaucoma, ocular melanoma, retinoblastoma, retinal holes, or retinal detachments, as well as some systemic, vascular, and neurological diseases, can develop without warning and progress without symptoms in their early stages.

By conducting a Wellness Scan using a 3D OCT camera, your eye doctor can simultaneously take a digital photograph and a 3D cross section scan of the back of your eye. This allows us to instantly diagnose a number of common conditions. This scan is non-invasive, painless, and can be completed within 60 seconds.

Wellness Scans are recommended for all new patients as baseline documentation of your retinal health in both eyes. Wellness Scans are offered as a service to patients at a cost of \$45.00. Insurance will not pay for this service, nor is there a billable code for this service, as it is elective and optional.

Options (please check one)

I elect to have a Wellness Scan at a cost of \$45.00

I decline the Wellness Scan
